LOG ARCH

Q: Looking for an affordable solution to your log transporting needs? Are you tired of all the restrictions and work involved when you skid logs? Do you want convenience, ruggedness and reliability, all at a reasonable price?

A: With an American Bandsaw Company Log Arch you can transport logs across the yard, field or even across the country. This unique log transport system lifts the log completely off the ground. The system combines log tongs, aircraft-quality cable and a gear-reduction winch to do most of the heavy lifting. The best part, all of this comes to you at an extremely competitive price.
